

# NRG, Hit Song

Get down with the dancing,  
Let's get it on follow me  
I want you come on baby  
Get down with the dancing,  
Let's get it on follow me  
I want you come on lady

My body shakes, but yours staggers. This long long night, different from me you stagger  
An awkward movement, if done wrong then excluded. If you don't develop yourself you'll be a baby

Play with me right now, I see you watching me Oh my Lady

When I dance with you Happy Lady, spraying me with passion Perfume Baby

I was no fun. A night without you was boring

I told you every day, you who lost interest

Without hesitation, you'll know my worth, so come close, hurry and come

Even when I close my eyes I can smell you and feel you right behind me

Close your eyes, are you ready? I'm high up in Kilmanjaro

My breath becomes course. The blinding bright light. My heart begins to beat

This in which we can't block. Leave yourself to the rhythm. You and I will become one

Get down with the dancing, Let's get it on follow me I want you come on baby

Get down with the dancing, Let's get it on follow me I want you come on lady

I'm nervous today, my lips are so dry, but my mood becomes slightly better

A surprising mistake that hits, a will power that shines like a star, Where did you hide your power?

You look sorry, does my heart not satisfy you? You accept others, why not me?

Winning is cooperation, do you think I want to quit?

Happiness times two, at work you're my senior, it goes in smooth and well, lets toast everyone!

Giving and receiving a good eye is a main point for us to entwine. Alright! An event for a seducing

Your breath and my skin that becomes slippery, trying my best to solve everything

Or instead just turn it over, gather your strength, everyone unite! unite!

My breath becomes course. The blinding bright light. My heart begins to beat

This in which we can't block. Leave yourself to the rhythm. You and I will become one

Get down with the dancing, Let's get it on follow me I want you come on baby

Get down with the dancing, Let's get it on follow me I want you come on lady

Hiding my true feelings, I ready myself, now everything is perfect

I only want you to come close, I want all of you.

My breath becomes course. The blinding bright light. My heart begins to beat

This in which we can't block. Leave yourself to the rhythm. You and I will become one

Get down with the dancing, Let's get it on follow me I want you come on baby

Get down with the dancing, Let's get it on follow me I want you come on lady
