

# Nuno Bettencourt, If Only

if only we loved us like before  
there would be more  
if only we could have stopped the war  
we were losing

love come back save the day

promises made 'til the day we die    died  
angry fists with broken wrists reply    why  
four more lips that tasted truth filled lies    lied  
only to return again

if only we loved us like before  
there would be more  
if only the scars would disappear  
verbal surgery  
if only we could have seen the smoke  
simple warning  
if only we loved us like before  
there would be more

love come back save the day

someone wake me    seems like lately  
all i do is sleep walk  
right through the fire

if only we loved us like before
