

OAG, Endless Dream

As something's up above, while we are down on earth
Waiting for your coming goal
As somewhere there is God, I almost forgot
and I should have known (3x).

I wanna believe
In everything that you once said
You gotta believe, in everything you do
you say, you play, we pray.

We recall all the scene
The place you've been you've seen
So tell me what you really mean
the things that made you sad
the things that made you mad
So tell me what you really want
and you should have known (2x).

I wanna believe
In everything that you once said
You gotta believe in everything you play
you pray, we say, we pray
and then it'll never be a dream.

Don't play around with yourself
coz you know you might get hurt
Don't make your mother cry
coz we know we might get burn in hell
and you know you might be still...

A big surprise... oh... (5x)
Realize... (Surprise... realize... surprise... realize...)
Don't be surprised... (2x)
dont be surprised... be kind... realized...
