

Oasis, Solve My Mystery

They took my faith
They put it in a headlock and
They sealed my fate
Somewhere inside the world
In which they live
Because I failed
They constantly ignore me and
They told me I lost my mind but
I believe that I rule the world

I'm singing out my revolution song
Like nothing else matters
And you can pitch your gold against my soul
But I bet you get shattered
And there's a million houses in my heart
It won't be long
It won't be long
Till I solve my mystery

It would for me
What do I believe in and
A masterkey
Is somewhere inside of the world in which I live
And what for they
They will speak for no-one
And I may have lost my mind
But I believe that I rule my world

I'm singing out my revolution song
Like nothing else matters
You can pitch your gold against my soul
But I bet you get shattered
And there's a million houses in my heart
It won't be long
It won't be long
Till I solve my mystery

And I'm singing out my revolution song
Like nothing else matters
And you can pitch your gold against my soul
But you gotta get shattered
And there's a million houses in my heart
And it won't be long
It won't be long
Till I solve my mystery
Till I solve my mystery
