

Ocean Colour Scene, Waving Not Drowning

Take that face right off yours
Its not yours love Its not yours love
You keep yours in a secret cup
Its flowing over Its flowing over
And I gave all that I gave you
I gave all that I dared
And I took it that Id claim you
And I took it that youd care
But you love you more than I do
And Id love you to be right
And the wave may crash around you
And Shipwreck you at night

Im waving not drowning theres no one looking on
Im waving not drowning on the horizon

Raise an arm we won the race
Im in your slipstream call it survival
You wrote the words for me on every wall
I thank the world for you were alive-o
We made it running empty and we drove away our fears
And we drank the life glass empty but nothing dissapears
And we swam a changing ocean
Our friends upon the shore
And we threw so many over
And watched some others fall

Im waving not drowning theres no one looking on
Im waving not drowning on the horizon
