

# Offset, Untitled

Start at the back of my head  
And peel my skin away  
I'll show you there is nothing anymore  
I've been dead for a while  
Don't let this smile make you think any differently

And what I want and what I need  
One more chance to live  
Well I had it but I lost it  
I choked on my last words again  
I hope to see you soon

Tell me what did you see  
When you looked inside of me  
Was there a doubt to all my words  
I've been dead for a while  
You can check my file  
Down the hall past the infirmary

And what I want and what I need  
One more chance to live  
Well I had it but I lost it  
I choked on my last words again  
I hope to see you soon

And all those times you could have sworn that it was in my grasp  
And all those times I could have sworn I felt you beating in my chest  
Well I had it but I lost it

Well I lost it all again  
Well I lost it all
