

# Oi Polloi, Go Green

Governments and multinationals  
Corrupt and twisted women and men  
Are going to bring this planet  
To a premature end  
With their selfishness and greed  
They destroy anything of worth  
Are you just going to sit and watch  
Their rape of mother earth?  
They just couldn't care less  
About the ecological devastation  
Inflicted by their insane striving  
For profit maximisation  
We've got to fight back  
We've got to give resistance  
Or they'll pollute and exploit  
Our world out of existence  
Industrial accidents and radiation leaks  
So babies are born as freaks  
Like the Re-Chen babies with one eye  
Or those who Windscale called before their time  
And the petrol is full of lead  
So kids grow up wrong in the head  
And aerosols destroy the ozone layer  
No protection - no we're laid bare  
And nuclear waste is dumped into the sea  
A slow poison for you and me  
And what was once fertile land  
Has now turned to desert sand  
And acid rain pours from the sky  
So whole forests wither and die  
And dirty cities grey and drab  
Cover the land like concrete scabs  
And toxic chemicals are pumped into streams  
Death where once life would have been  
The whole situation has got out of hand  
So go green and make your stand  
And it seems you couldn't care less  
That our earth is in such a mess  
It makes me wonder how long it will take  
Before you finally awake  
Please, please you got to open your eyes  
'Cos you've got to realise  
Exactly what those in power got planned  
This is the last chance to make your stand  
Now that we see what's going on  
We've got to stop them and we aint got long  
This isn't something just to sing about  
'Cos our time is running out...
