Old 97's, King Of All The World

I was in a real bad way When you turned the power on And you made me feel for all the world Like I was the king of all the world I was on a window ledge When you came upon me there Everything was upside for the moment Right around the time I had to get going Can't count me out Cause I've got your number You make me feel like I'm The king of all of the world King of all of the world The king of all of the world Now I'm on my way up north All its gonna do is rain And I'm gonna want to go back to the world Where I was the king of all of the world Can't count me out Cause I've got your number You make me feel like I'm The king of all of the world King of all of the world The king of all of the world I was in a real bad way When you turned the power on And you made me feel so right at home I wonder if I'm ever gonna get back home Can't count me out Cause I've got your number You make me feel like I'm The king of all of the world King of all of the world The king of all of the world If I wander out Of a picture window
