

Old Dominion, How Good Is That

All your wishes dried up in your wishing well
Took a shot in the dark, now it's shot to hell
Chips are all falling in the wrong direction
The mirror's only showing all your imperfections

Maybe it's time for you to stop on a dime
And get to turning your frown around upside down
You know the storm always passes
Put on your rose-colored glasses

How good is that song on the radio
How good is that top-down summer night
How good is that rock when it's on a roll
And there ain't no slowdown in sight
Maybe it ain't all good but I swear it's alright
Take a big ol' swig of the simple life
How good is that, how good is that

I get when you're in it, it can mess with your head
You get up and go would rather stay in bed
Just remember that I love you and that ain't gonna change
I'm here to make your heart feel like you just got paid

How good is that song on the radio
How good is that top-down summer night
How good is that rock when it's on a roll
And there ain't no slowdown in sight
Maybe it ain't all good but I swear it's alright
Take a big ol' swig of the simple life
How good is that, how good is that
How good is that, how good is that

Well maybe it's time for you to stop on a dime
And get to turning your frown around upside down
You know the storm always passes
Put on your rose-colored glasses, yeah

How good is that song on the radio
How good is that top-down summer night
How good is that rock when it's on a roll
And there ain't no slowdown in sight
Maybe it ain't all good but I swear it's alright
Take a big ol' swig of the simple life
How good is that, how good is that
How good is that, how good is that
