

Olivia Lufkin, Skip To a Little

Can i take your time and light on some thoughts of mine?
What does it matter the thoughts they think?
Find your grounds and watch them sink
The 9 to 5 work cycle has got us stuck in a lane
We slowly lose our name trying to stick with society's parade
Kouhai blow your senpai
On to your knees
Say you're kidding, please!
These ranks, classes, and cliques you've made
Your hiding under the name
You know the fact of this matter is we are all the same
We should
Skip to a little number
Skip to a little number
All that you can fade away
Skip to a little number
Skip to a little number
Now, now, if you can stand your ground
And jump off society's merry-go-round
Can i turn this page?
Can i take you to the next page?
Take a breath
Take your time
Take a seat
Take it down that drink
Drink it down
Till you
Crack a smily up nice and proud
Let's all be loud
Play the song!
Sing along
We should
Skip to a little number
Skip to a little number
All that you can fade away
When you
Skip to a little number
Skip to a little number
