Olivia Newton-John, Don't Say That

(Olivia Newton-John /Chris Farren)

I love you, I want you, I need you
Are the lines I've heard
I'm wanting so much to believe you
But don't use words
By the look in your eyes, I see you're getting weak
Please, fight the urge to speak

And don't say that --not now, not here
I just wanna feel your touch
And don't say that --too soon, I fear
Show me something I can trust
You stole my heart on the night we met
And I'm not ready to follow it yet
So whatever you do --don't say that
Don't say that

Just hold me and show me you love me
That says it all
These moments of tenderness
Mean so much more
And we'll get there eventually
So, please be patient with me

And don't say that --not now, not here
I just wanna feel your touch
And don't say that --too soon, I fear
Show me something I can trust
You stole my heart on the night we met
And I'm not ready to follow it yet
So whatever you do, don't say that

Don't say we'll last forever
We'll always be together
Just lay here silently next to me and don't say that
Don't say that, no

Don't say that --not now, not here
I just wanna feel your touch
And don't say that --too soon, I fear
Show me something I can trust
You stole my heart on the night we met
And I'm not ready to follow it yet
So whatever you do
Your kiss is all of the proof I needed
So whatever you do
Don't say that, oh, don't say that
Don't speak, don't talk
Just hold me honey
You don't have to use words
Just hold me honey
No need to speak
No, no, no, no don't use words
