

Olivia Newton-John, Electric

(John Farrar)

From the beginning I was on to you
But like a magnet I was drawn to you
Don't leave me waiting here in the dark
Switch off the static of a broken heart

We're holding a live wire,don't let it go
Not before you know-
You make me feel electric
You turn everthing on
You make me feel electric
Your connection is strong
You make me feel electric
I don't want it to stop
You make me feel electric
I'm still in shock

It's not your look that's getting through to me
It's what your human hands can do to me
You have a power to shake me up
Your touch is all it takes to wake me up

We're holding a live wire,don't let it go
Not before you know-
You make me feel electric
You turn everthing on
You make me feel electric
Your connection is strong
You make me feel electric
I don't want it to stop
You make me feel electric
I'm still in shock

I never thought I'd want this kind of affection
You are the exception-oh no

Ah,You make me feel electric
You turn everthing on
You make me feel electric
Your connection is strong
You make me feel electric
I don't want it to stop
You make me feel electric
I'm still in shock
You make me feel electric

You make me feel electric
Your connection is strong

You make me feel electric
I'm still in shock
You make me feel electric
You make me feel electri-i-i-i-i-c
