

# Olivia Newton-John, Let It Shine

(Linda Hargrove)

A woman needs attention like the flowers need the sun  
Without that attention, a woman feels undone  
Now I'm like a flower that's been standin' in the rain  
Hopin' and a-prayin' that the sun would shine again

Is there anybody out there who can shine?  
Anytime would be fine  
Is there anybody out there who can glow  
And would like to see a little flower grow?  
Shine on me, let it shine

A woman needs a lovelight to keep her body warm  
You know without that lovelight, well a mind can do her harm  
Now that light's gone out for me and I'm standin' in the dark  
Hopin' and a-prayin' just to see a little spark

Is there anybody out there who can shine?  
Anytime would be fine  
Is there anybody out there who can glow  
And would like to see this woman's lovelight show?  
Shine on me, let it shine

Is there anybody out there who can shine?  
Anytime would be fine  
Is there anybody out there who can glow  
And would like to see a little flower grow?  
Shine on me, let it shine
