Omen, Don't Fear The Night

Through all the pain and sorrow You chose to stand alone Out in the light like the desert Sun you've shown We all make the bet We all try to forget The pain that we have shared But now you know:

Now, now you know Now you know The pain will grow

Only a fool would try what you have done Stood eye to eye while under the gun On and on you run for your life All of your fears are they only in your mind

(Chorus)
Learn to stand learn to fight
You know the truth you've got the right
Learn to stand learn to fight
Speak the truth don't fear the night

You look away but still the truth it burns Only a broken man he never ever learns As all of your dreams slowly melt away Once again there's nothing left to say

(Chorus)

Don't fear the night Don't fear the night Don't fear the night Don't fear the night:

Through all the pain and sorrow You chose to stand alone Out in the light like the desert Sun you've shown We all make the bet We all try to forget The pain that we have shared But now you know

(Chorus)

Don't fear the night
Learn to stand and fight
Don't fear the night
