

# One-21, Pacified

you've been you've been Americanized  
you've been you've been Americanized  
you've been you've been American  
you've been you've been Americanized  
open up your eyes you've been Americanized  
open up your eyes

a difference  
what we're claiming to make  
as we strive to be amused  
we sit back in all our comforts as  
the world wonders where've we been  
we're held captive by U and VHF  
well we're prisoners of our own device  
doing what's right in our own eyes we forsake the truth to cling to a lie

you've been you've been Americanized  
you've been you've been Americanized  
you've been you've been American  
you've been you've been Americanized  
open up your eyes you've been Americanized  
open up your eyes

laziness plagues our people  
diseased we sit on our hands  
hedonism crept in like a snake  
but we failed to recognize it  
i say it's a foothold he's got on us  
or maybe one we've given to him  
well its time to take it back  
i said its time time time to take it back

you've been you've been Americanized  
you've been you've been Americanized  
you've been you've been American  
you've been you've been Americanized  
open up your eyes you've been Americanized  
open up your eyes

our homes become our tombs  
our beds become cocoons  
this is not a song of condemnation  
this is a call to arms  
the lion lies in wait to devour us  
we must be ready  
the lion lies in wait to devour us  
this is a call to arms

you've been you've been Americanized  
you've been you've been Americanized  
you've been you've been American  
you've been you've been Americanized  
open up your eyes you've been Americanized  
open up your eyes you've been pacified  
open up your eyes (open up your eyes) you've been Americanized  
open up your eyes (open up your eyes) you've been Americanized
