

Onelinedrawing, Got My List

Some days I feel affected
and then it all disappears
rain and clouds above my head
and then it all disappears

Chorus: i'd understand it if i could grab it
another wish on my list
one more day we've made it through now
got my list, got my list
one more day we've made it through now
got my list, got my list, got my list

some days i feel protected
and then it all disappears
breath as two then think as one(disappears disappears)
(Chorus)
one more day we've made it through now
got my list, got my list(x4)

got my list, got my list... (etc.)
