

Oomph!, Song For Whoever

Hey man! what's up? what the fuck is wrong with your mind?
my god! you suck! you're so fucking stupid & blind!
you smile - you lie - you're so mother-
fucking sublime - fuck you! goodbye!
'cause you're fucking stealing my time
first you explore and you wanna taste
then you exploit and you're laying waste
while you destroy and you don't repair -
you cannot open your mind
you always judge while you can't forgive -
you only take but you never give -
you sit and wait on your liar's chair -
you cannot open your mind - pain in your head now
you toss + turn in your bed now - pain in your head now -
if only you could forget now - pain in your head now -
and you deserve what you get now - pain in your head now
you only wish you were dead now (this fucking pain)
hey man! shut up! 'cause i've had enough of your lies -
what should that fuck? - you're a fucking creep in my eyes -
you still deny - i'm so fucking sick of your kind -
fuck off! and die! you can fucking kiss my behind
...you're a fucking waste
