

Opeth, Benighted

Come into this night
Here we'll be gone
So far away
From our weak and crumbling lives
Come into this night
When days are done
Lost and astray
In what's vanished from your eyes

What came and distorted your sight
Saw you benighted by your fright

Come into this night
Your plight alone
Carry your weight
You are flawed as all of us
Come into this night
You only home
It's never too late
To repent, suffer the loss

What came and distorted your sight
Saw you benighted by your fright

What came and distorted your sight
Saw you benighted by your fright

Come into this night
When you're able
To undo your deeds
And atone with your lonely soul
Once you're into this night
All minds are stable
Forget all your needs
Lose the grip of all control
