## Opeth, Coil

She told me why she told me lies Always take care of this I told her how I've always stayed Always waiting for nothing

When I get out of here When I leave you behind I'll find that the years passed us by

And I can see you Riding through the fields of sorrow

When you get out of here When you leave me behind You'll find that the years passed us by

And I can see you Riding through the fields of sorrow
