

# Ophelie Winter, The Air That I Breathe

It's been seven hours and fourteen nights  
Since the day we met and it feels so right  
All I see and all I do, make me think of you  
Babe you make me feel so new

Everything I touch, everything I see  
Makes me wanna be with you darling  
Everything I taste, everything I dream

You are the air that I breathe  
The only thing in the world that I need  
You are the air that I breathe  
The only thing in the world that I need

We take a walk on a moonlit road  
And I call your name and I've got to know  
Why your love makes me feel so good  
How I need you like, I never thought I could

Everything I touch, everything I see  
Makes me wanna be with you baby  
Everything I taste, everything I dream

You are the air that I breathe  
The only thing in the world that I need  
You are the air that I breathe  
The only thing in the world that I need

I know our love is holy  
Two in love are never lonely  
You are the only one for me

You are the air that I breathe  
The only thing in the world that I need  
You are the air that I breathe  
The only thing in the world that I need
