

Orange 9mm, 7

Forget what I said and why I said it
I don't think you ever wanted to know
You'd wanna make an excuse on your own
Rather decide who you could blame it on
I get the picture you like to deceive
Whatever you can so you can get your piece
I'll live and die but I will never believe
I stayed so long and that I let my whole body bleed
What 's f**king wrong with your head?
I bet you swear you never did it
But I gotta tell you something while we're alone
Hide your lies but lies make burns
I've got a scar so now I've got a concern
You ain't a human, you're more like a disease
Some of the sickest shit I've ever seen
I'll live and die but I will never believe
I stayed so long and that I let my whole body bleed
What's f**king wrong with your head?
You've got it on too tight
