

Orange Blue, Carelessly

Never suffered love so easily
It's like a dream being raised from its sleep.
You showed me the face of northern lights
Breath of words I inhale every night
And I must have done a thousand rhymes
But I wonder where you sleep at night

You fill my dreams and share them with me
You are the seeds of what will come
And I'll be in love with you forever.
I would never use a word like this
Carelessly

I don't care about a thing they say
There were times when I thought that I should
Cause they don't know about my inner face,
No one has come as close as you do.
My affection scares myself sometimes
I intend to love you till I die

You fill my dreams and share them with me
You are the seeds of what will come
And I'll be in love with you forever.
I would never use a word like this
Carelessly

Even in our darkest days
You brought light when there was haze.
I will never be far
From the place where you are,
I could never use a word like forever
