

# Oratory, Life In Another Star

They came from deep space  
From the land we never saw  
They are a strange race  
And we expect them to save our souls  
They said there is so many  
Life out there  
That some it will cross your lands  
And send me a sign of life

We have to wait for the light in the dark  
A real sign about the big question-UFO.  
'cause we believe that there is  
Life in another star  
Life in many stars
