

Orbita Wiru, Badland

Scream loud, louder than you can
If you'll be felling each others pain.

Let's declare war against violence
We have to cure mother earth.

We have to cure the earth for vileness
Protect your children from inner hate.

My proposition and request, let's build the BADLAND.
Forgotten place, damned place somewhere in universe.

We should find another planet, forgotten place
In a boundless universe.
All "bad heart people" will be locate there irretrievable
And sentence to such evil they used to livin' between us.
This is my dream, my desire, biggest request to almighty God.

My proposition and request, let's build the BADLAND.
Forgotten place, damned place somewhere in universe.
This is my dream, my desire, biggest request.
We have to find forgotten planet somewhere in universe.
