

Orgy, Vapor Transmition

Suckerface

Bring me back the time
Because you know you're special
And we think you know you're wrong
Suckerface you're special
Do you believe yourself it's not science
Do you hide from your reflection
Do you believe yourself to be
Number one in the world-electric
Raised by the queens your mother paid
So how does that make you a human god
And all the ladies want you
and sometimes gentlemen too
And still we think you know you're wrong
Bring me back the time
Because you know you're special

The Odyssey

What would you do if you
finally believed in yourself
But you just don't know your ass
from a hole in the ground
So true it's a violation
Hide yourself from the same old memories
Your image is your invitation
There's no time for sleep
so motherf**ker come on
Welcome to the Odyssey
Prancing through a black hole in the sky
from the 30th century
So you'll feel like me
You traded in your high school ring
To get away from the pom pom boys
and the jock strap girls
Yeah, give me the super pill
to make things better
Yeah, the super pill
to make everything alright
The odyssey
You've been driven by
your faceless personality
And your image is
your own faceless odyssey
Come on I'm very curious

Opticon

Let's fake an answer for the curious,
Let's fake it all for the fame.
They'll think delivering was easy,
Living the fairy tales and the lies, lies
Message from Opticon
Blast from the Fashion Bomb
So helpless,
guess what you're out of... time
New alien spawn
We reinvent the dawn
And no one's style compares
Those neon eyes
Make mom and dad think
that we've lost our minds
They're just terrified of all new things
Opticon is here to lead us
Opticon is in control
So quick to change us

And imitate us

Fiction (Dreams in Digital)
She's lost in coma
where it's beautiful
Intoxicated from the
deep sleep, deep sleep
Do you wonder what it's like
Living in a permanent imagination
Sleeping to escape reality,
but you like it like that
Guilty by design
she's nothing more than fiction
She dreams in digital
'Cause it's better than nothing
Now that control is gone
It seems unreal,
she's dreaming in digital
She dreams in digital
And your pixel army can't save you now
My finger's on the kill switch
I remember I used
to compose your dreams,
control your dreams
And don't be afraid, to expose yourself
before I shut you down
You've made some changes
since the virus caught you sleeping

Eva
You know I started to grow
since you've been away
Lately, it's scarier not knowing
what's become of you
Are you proud of me now,
I can't tell
I'm not as fearless as you
Still I pretend that
you're still standing by
To show me wrong from right
Never got a chance to say goodbye
Take this gift from me,
hold it deep in mind,
forever and never let this go
I used to think you were crazy
When you were hooked to the screen
But now they tell me that
you're in a better place
But where did you go
And I swear sometimes
you're watching over me
Still I'd give the world
for the chance
just to see your face again
Now, there's nothing left but time
Know that I'm following you
Eva's always on my mind
and it makes me wonder
What happened to you?
You know it makes me wonder
Still I pretend that
you're still standing by
to show me wrong from right
And never let this go away

107

It's about this constant addiction
About this greater demand
As I reach for the laugh with only seconds left,
I'm getting deeper
And did you say that you were happy
'Cause I won't leave you alone
I need the push to
elude to things I have to say
To what I have to say
There's a time and a place, we hide behind
An alternate face
When the freak needs a nurse you comply
With the fools in mind
We're the people who f**k with your mind
When you sleep inside
I can take you away
To a better place, to a better time
I can take you away
To a better place
Let's talk about you and me tonight
'Cause I'd really like to take you home
'Cause I need the push to
elude to things I have to say
And remember the times that
we've shown you the way
With so many faces
And remember the times that
we've shown you the way
We can change your mind

Dramatica

I caught their sparkle from the runway
Such a fool for the amazon
Nothing's wrong but it's just not right
The three of us in the naked light
No chance for psychotic solutions
Lost in this three-way dimension
Imagine you as me and I'll tell you
Just what I'm thinking
That it feels like you, feels like I, feels like we do
And it feels like feels like I, feels like we do
And everyone's daze is on
Look what you've done
You give yourself away for nothing
(feels like you, feels like I, feels like we do)
And give it all away for nothing
(feels like you, feels like I, feels like we do)
When will you escape dramatica
Gifts of pleasure you recieved
Everything you wanted from me
Chemical abduction, restricted our vision
We were on auto drive
Don't blame the platforms for your fall
We were chasing obsession
Imagine you as me and I'll tell you
Just what was on my mind that night
'cause it feels like you, feels like I, feels like we do
What's on your mind?

Eyes-Radio-Lies

Slipping past position
You know I watch you drive

Watching you painted in chrome Max Factor
And feeling #1
All alone now
I can see you a way to the drone
Radio waves hitting your brain from the phone
Yes I can see
Chorus: I can see what's on your mind
'Cause you're never alone
I am the voice inside your head
And the eyes in your radio
I'm the eyes in your radio
Hello Mr. Racecar driver
You know I'm watching you too
In the trauma room brain dead
Still you went faster
Now your # means nothing
Mr. Nickel-plated candy man
Are you feeling lifeless in aluminum
Spitting decisions to the core
As everyone dances in the fast lane
chorus
With all that's fake, there's sense to make
From toys that break
It's time to throw away all
the bad things that you hated
You scared yourself away
Now hate's what you appreciate
That's why people lie
People like you
People like me
So go away
chorus

Saving Faces
She lives the glamour days
The Euro-fashion phase
So set another trap some other way
'Cause she's not biting
And oh no she's getting wasted again
Imagine that
Hooked on saving face
What are you thinking
What are you doing here
chorus
You pretend you're safe inside,
but I know what no one knows
Where's the same, undefined by you
As you're living thru my eyes
Always living thru my eyes
She's taking over the game,
and always running away
They've tried to tug her in so many ways
Still she's inviting
And oh no she's playing bastard again,
imagine that
Hooked on pointing fingers
Are you breathing
What are you doing here
chorus
'Cause it's a union of androgyny
That lingers like the plague
Know it's still a question of gender
Imagine she's pretending that
she's hooked on saving face
What were you thinking

What are you doing here
chorus out

Re-Creation

I could've made a wish but it wouldn't come true
The white trash bitch controls you
Born and raised in a trailer park
And all the faces of the lies surround you
Your simple pleasures come
from someone else's pain
The way you like it
For you-I've become what you made me
chorus
And we make this new religion
To escape what we've become
Your signal's fading so let go
And we make this new religion
As the program showed us
To escape what we've become
So you played along, you couldn't help it
And the followers stand in line
(followers stand in line)
Her signal's fading so let's give it one more try
As the soldiers walk right by
To face this Re-creation
chorus
All you people move so slow
We can tell you what you're thinking
So you played along
chorus 3x

Chasing Sirens

If you need to change your style sometimes
To please and satisfy
They'll call you a hypocrite
You're giving birth to all new trends
Visions they'll never comprehend
Because they're all so selfish
chorus
Everyone look at me
Chasing sirens
Demanding their attention
So selfish
Trying to discover what's wrong with my mind
So they started the upheaval
But you prompted the war
You're still a hypocrite
Snapping the sleepers into motion
So their systems will change
Right now you're giving up but let me show you
chorus
You like to be the center of attention, don't you
Under the spell of another phase
So pretentious
Plastic uninvited
Don't you find it strange
How they wear their egos on their sleeves
Until they see your face
Chorus
This day should last forever
Stuck on the merry go round
Keep spinning, never want to come down
So selfish

Where's Gerrold

You're light bright and animated
A demolition color scheme
Mismatched and complicated
Who put the hex on Mr. X
Living in a bigtop dimension
You're the stalker of the mini world
Trapped in wonder land suspension
Transmissions from the micronaut girl
Where are you now
And we'd like to think you found your own way home
On your own
Where's Gerrold now
You're a visual illusion, like Christmas,
A trend setter for the color blind
A think fast colution, no way out
Washed away with the crimson tide
Transglobal spectacle with post mortem fame
Popsicle cannibal
Can you hear me
Rainbow dementia smiles, everyone smiles
The small realities, a pixie playland
Can you find yourself in bright lights flashing
Cover my eyes
I'm feeling sick, I'm getting paranoid
Find yourself
With bright lights flashing
Bright lights flashing
I'm feeling paranoid...

It's the typical ones who want out
'Cause it's getting critical
And the curious running away
They are the furious ones
It's the perfect disguise known as fear
It's a shame it's a phenomenon
Slapping our faces and laughing away at us all
chorus
What does this mean
To have my way with you
Distance me
Discovering the truth
Arranged for something new
'Cause it makes me feel good now
I get excited by the signs
As the provider of random sex
You're getting skeptical
Since you've joined my parade I can laugh
I've had you my way
It was perfect inside
Now I feel
It's a shame you're a phenomenon
Shadow embraces an innocent plan for us all
chorus out
