

# Orion's Reign, Nuclear Winter

The night is long, the planet cold  
The shadows loom above my head  
The fear of what will strike us next  
Abandoned on a poisoned earth

We who survived went underground  
Six months our eyes saw no sunlight  
Who pressed the button, how and why?  
It doesn't matter anymore

{Bridge}

Oh the children of men  
Waste their homeland  
Brought death into life  
Nuclear tears they cry

{Chorus}

Men die in pain, weakened eyes  
Decisions have their price  
Civilizations lost  
Now who will survive?

The war commenced, better in hell  
The dust raised high and snuffed the sun  
The nature now a barren land  
When raindrops fall we hide or die
