

# Osada Vida, Sky Full Of Dreams

He was just like poster heroes smiling from his walls  
Trying to be one, who can save, whole the world  
In his mind there was story that he could have tell  
But one really try to understand

He was all alone  
He was taken by the fool  
Choosing different empty paths  
Like the only that he felt to be his own

Let your spirit fly  
Let him take you to the open sky  
Don't forget that there's a different place  
That can be your home

Many years he have been made to stumble in his ways  
Times have changed but he just seem to be still the same  
Living in the world of fantasy, he did the best he could  
A lot of dreams have turned into real

All we have the hidden spirits deep inside  
Afraid to live in a different way, closing our minds  
All our lifes are slipping through the fringers of one hand  
What if we could try to wake us up

Let your spirit fly  
Let him take you to the open sky  
Don't forget that there's a different place  
Let your spirit fly  
Let him take you to the open sky  
Don't forget that there's a different place  
That can be your home
