

# Otto Knows, Parachute

One by one we see the sun  
Feel the day has just begun  
Tremble lights up in the clouds  
All we need to feel is now as we work

Get me a parachute, take me to the sky  
Just take me to the blue before I start to collide  
Get me a parachute, take me to the sun  
Would be a miracle to turn this world into one

Get me a parachute

Get me a parachute, take me to the sky  
Just take me to the blue before I start to collide  
Get me a parachute, take me to the sun  
Would be a miracle to turn this world into one

To turn this world into one

Get me a parachute
