

# Our Lady Peace, In Repair

Well it's good to know that you'll be okay  
I've been waiting for this  
And I'll be there to sit  
While you pray no one's blaming me  
I'm not supposed to wait  
When they open up your heart...

I have been good  
I understood  
Like a machine they'll fix you from the start  
I'm in repair  
The life that we share  
I know that I'll be lost in  
But we're always in repair

Lock the door, lock the door  
And it's good to know that you'll drive away  
From this car crash nightmare  
And I'll be there to help you again  
There's no danger  
We're just killing time again  
When they order up new parts

I have been good  
I understood  
Like a machine they'll fix you from the start  
I'm in repair  
The life that we share  
I know that I'll be lost in  
But we're always in repair

Take this time to figure it out  
Know the wire, the fuse, the things that you doubt  
The wheels, the air, the metal, the mouth  
Something, something, something  
I have been good  
I understood  
Like a machine they'll fix you from the start  
I'm in repair  
The life that we share  
I know that I'll be lost in  
But we're always in repair

Take this time to figure it out  
The wire, the fuse, the things that you doubt  
The wheels, the air, the metal, the mouth  
Something, something, something
