

Ours, Live Again

The cuts are gonna make you forget years
You married someones carrying your tears
But you sleep with the ones that keep you from all that
You're sad yourself you can't afford to feel
So live again

Live again

The carousel goes down through hell and fear
Forgive yourself and then you're gonna heal

Live again x4

Now you see that when we were young there was truth and all
That came with

The cuts just leave us there blessing for those

Repeating all of our past

'Till all of it's gone

All if it's gone

Again

Live again

Live again

Live again

Now you see that when were young there was truth and all

That came with

The cuts just leave us there bleeding for those

Repeating all of our past

All of it's gone

All love it's gone

Again
