

Out of Eden, Get To Heaven

So many times I've walked this way
Too many times from you I've strayed
Fallen way behind, too my former state of mind
I look around what do I see, so many strugglin' just like me
Tryin' to live this life, falling down to compromise
But then I have a question, is that what we're living for?
Aren't we called to perfection, to strive for so much more
I find that we have settled too many times
Should not be so, I think it's time God's letting us know

Chorus:

We need to get it right
No need to walk this way this way no more
We need to step in the light,
And find out what we're livin' for
The voice of God is drawing near
Only the wisest ones will hear
Seeing the world today will you choose to go his way
It doesn't end in choosin', because in all we do
We're called to keep on goin', pressin' on just to remain true
(chorus)

I can see how the other life it must look so nice
But what lies after it's over far from paradise
Gotta know there is nothing worth missing the call
Let me tell you He is calling and you've got to give your all
(chorus out)
