

Over It, Where The Sky Begins

See that line where the sky begins, that's where we'll go.
When the road disappears on us that's how we'll know.
Drive away till you find a new day.

They say life reads better than the magazines
When the phone's dumb and work's a bust and talk is cheap.
Drive away till you find a new day- find a new day.

I'm gonna be the driver
Watching headlights fade out in the rearview mirror,
Blasting holiday,
Letting the sound take over
Till we find a new day.

Take it easy lover, Take it easy.

[Chorus]

Got a friend in this stretch of town i used to know.
Got so tired of the freaks and plastic spectacles.

Drive away. Drive away. Find a new day.
