

Paffendorf, Self Control

It's all about self control

For you
Creature of the night
Go and try to fight
All night

I ain't take your self control
With your body, your heart and your soul

It's all about self control

I ain't take your self control

You take myself you take my self control
You take myself you take my self control
You take myself you take my self control
You take myself you take my self control
You take myself you take my self control

See my signs
Feel my voice
Hear my order
Listen to my voice
I ain't take your self control

I ain't take your self control

You take myself you take my self control
You take myself you take my self control

It's all about self control

You take myself you take my self control
You take myself you take my self control
You take myself you take my self control
