

# Pages, Take My Heart Away

She will never be the girl back home, she acts as if I should have known  
The way she loves is so new to me, the words she says I do believe

Chorus:

Take my heart away, I can't live much longer

The way I did before you found me

Say the night you'll stay, my love just gets stronger

I never knew what was missing, so alone and never giving

I needed you and you came to me, when no one else could save me

(chorus)

Don't run away this time, it takes so long to find

The love that's in your mind will always be there

(Solo)

(chorus - with "Say this night you'll stay")

And take my heart away, I can't live much longer

The way I did before you reached out to touch me

Say this night you'll stay, my love just gets stronger
