

# Paisley Brain Cells, Days Of Summer

If I told you in a simple way  
We can't last forever, would it be okay  
And would you love me, here anyway  
Keep the fire burning till the light of day  
All night long you turn me on and baby you're the one  
Till the days of summer, till the days of summer  
Till the days of summer are gone  
When you tell me that your love is true  
Does that come from your heart or just your point of view  
And can you show me that love is for real  
There's no misunderstanding for the way I feel  
All night long you turn me on and baby you're the one  
Till the days of summer, till the days of summer  
Till the days of summer are gone  
Cool wind blows back my hair at night  
Feels like summer, kind of feels all right  
With my love, I lie back in the sun  
Look at all the people chasing time, on the run  
I hear laughter in the raging sea  
Voices on the wind are calling out to me  
Deep inside, so wild and free  
Music in my heart, the fire inside of me  
All night long you turn me on and baby you're the one  
Till the days of summer, till the days of summer  
Till the days of summer are gone
