

Palaxy Tracks, The Criminal Mind

Take the old you and bury him down by the creek
In the morning we'll come with the light so that we can see
If you don't hide they'll be coming for you tonight
Under cover of stars we can make you a good disguise

Can you live underground?
Where the Sun, it doesn't shine
Lonely, lonely... take your time

But don't take it wrong, I have learned from the best of them
In a flurry of words say hello to the criminal mind
Get married in white
We can color your hair and learn to walk with a different stride

Some of us have found you gotta run for your own life, Sara
And the choice you made
Turn the gun away
The brighter side is the son you raised
May he learn his way
