

# Paloma Faith, Just Be

Let's grow old together  
Let's be unhappy forever  
Cause there's no one else in this world  
That I'd rather be unhappy with  
Let's be exposed and unprotected  
Let's see one another when we're weak  
Let's go our separate ways in the night like two moths  
But know that you're flying home to me  
I was born thinking it would all be dreaming  
But I know that I wouldn't be happy that way

You wear me out with frustration and heartache and anger  
But we wait for the wave just to wash it away  
Don't say nothing  
Just sit next to me  
Don't say nothing  
Shhh  
Just be just be just be  
Let's let go together  
Let us unfold one another  
And watch all the little things that once drew me to you  
Eventually get on my nerves

I wear you out with frustration and heartache and anger  
But we wait for the wave just to wash it away  
Don't say nothing  
Just sit next me  
Don't say nothing  
Shhh  
Just be just be just be

When you're sick of the everyday ohhh  
When you're tired of my voice  
When you tell me you walk out that door  
That's when I know that you'll stay oh

Don't say nothing  
Just sit next to me  
Don't say nothing  
Just be just be  
Just don't say nothing  
Just sit next to me  
Don't say nothing  
Just be just be just

Don't say nothing  
Shhh
