

Papermoon, Lucy's Eyes

The clouds are red
The sky is black
Let's dive into the night before it's over

Just give me one more cigarette
And if you want it now
We'll stop the time

And turning on a roundabout
In a confusing scream and shout
The lights are flickering you say

Did you ever talk to Lucy in the sky
Did you ever try to fly
Take a look at the world inside her eyes
Did you ever talk to Lucy in the sky
Did you ever get so high
Take a look at the world inside her eyes

The grass is high and so are we
We hide away until the dream is over
Just open up your eyes; you'll see
A rainbow rising all across the sky

And if you take me by the hand
If you show me our land
We could be happy for a day

Did you ever talk to Lucy in the sky ...

She will drive in your mind
A train without a destination
Without a station anyway

And if it ever gets you down
The world is turning round and round and round
It's just like being lost and never found

And if you take me by the hand
And if you show me our land
We could be happy for a day

Did you ever talk to Lucy in the sky ...
... the world in Lucy's Eyes
