

Paprika Korps, Mind Explorer

Explore the mind and reach salvation
Solve the puzzle of creation

Past events, past lifes happened to you
More than just a feeling of a deja-vu
I feel like a onlooker into my past life
Cutting into previous times my mind the knife
When hallucinating seem things in dreams
Could I see into the future? It isn't what it seems
I say it's confusion the way that I feel
Chemical inside me makes it so surreal

Explore the mind and reach salvation
Solve the puzzle of creation

They hold the strings, salvation is far
You'D like to see things the way that they are
They don't want you discovering your mind
They stay in power, while you stay blind
Wisdom, knowledge you must devour
Threaten convention, those in power
As will the opressors in authority
Who'd hate to see our land totally free

Explore the mind and reach salvation
Solve the puzzle of creation

Ragga technician is on the mission
Against those who stay in power while you stay in vision
Watch out a feel a reggae wide attack
Bad days now are gone, the rotten system gone out
So people people move your dancing bodies
Destroy the old statement make everything clear
Our mind shall burn, with or without cannabis
The time is incoming, and the prophecy is near
