

Paris, Electronic Overdose

My photocells react and contract
your overloaded and fully stacked
Your the latest out of a box
latex covered on the rocks

Your sockets are so inviting
and your surface feels exciting
In my wires the frequency is rinsing
high end circuits start fantasizing

Give me your electronic overdose
your my electronic overdose

It tingles in your blood
It touches your soft skin
It calms your nervous bones
and softly pulls your wild hair

Lets swim in a neon pool
Lets walk on a carbon beach
Lets play under the ir-sun
and dream under the uv-moon
