

Pathos, Under The Lense

We're building pressure, and take apart
Reproduce the lifeless heart
Explore the limits, we twist our will
In time we live to kill
Star formations cease to be
Fragments of a race will see
Extinction of a planet small
We must change and try to stall
Under the lens, we will evolve
And try to all the problems solve
Inside a world, that does not fit
Because for life it is too small
Under the lens, we will evolve
And try to all the problems solve
Inside a world, that does not fit
It will bring us to our fall
Star formations cease to be
Fragments of a race will see
Extinction of a planet small
We must change and try to
Star formations cease to be
Fragments of a race will see
Extinction of a planet small
We must change and try to
Under the lens, we will evolve
And try to all the problems solve
Inside a world, that does not fit
Because for life it is too small
Under the lens, we will evolve
And try to all the problems solve
Inside a world, that does not fit
It will bring us to our fall
Under the lens, we must change
We will evolve
