

# Pato Banton, Only Love

Mankind is an endangered species heading for extinction  
if man is to avoid this self-destruction and doom  
he has no alternative but to learn to love.

Only love can keep us together  
only love can keep us going on.

I have seen many wonders in my time  
I thank God for the gift of life.  
Many mountains does man have to climb  
in search for himself to find.  
And after all is said and done  
it&#039;s only love that keeps us going on.

There&#039;s some things I see I just can&#039;t understand  
why can&#039;t people live as one.  
Don&#039;t they realize the beauty we could have:  
no more wars, no pollution, no more segregation.  
The future is in our hands  
so come on and love!

Imagine what a beautiful world this could be  
with a little more love we all could agree.  
Wipe the tears from the hungry child&#039;s eyes  
more, more, more, more love!
