

Patrice, Dove Of Peace

Excuse me sir, you have a licence for that war /
Raising Sodom and Gomorrah but what about tomorrow /
Hey Mr. President you never present no evidence /
When it is fully evident that your habit needs betterment /
Yes I know who you are but could you please breath in this bag /
And now let me see how straight a line you walk /
How come you slur your speech like your words are out the reach /

See people like you just don't practice what they preach /
You say the people shall not kill /
When you have blood on your hands /
You say the people shall not steal /
When you just talk what you can /
Why can't you keep it real /
Why can't you just come straight /
I wonder how you sleep /
Or if one day you will break /

Chorus :
We've got to reach up as high as we can reach /
Teach those with guns the power of speech /
Remove the bullets from the breach /
And feather a nest for the dove of peace /

Gather the nest it's in our own interest /
Tell me who wants to see that the red button being pressed /
See there's war un the east and there's war in the west /
They say god bless us there're saying god bless U.S /
Why not invest the same amount of interest /
In same other places where the oil doesn't rest /
All people are blessed and this is a test /
I make just one request let us clean up this mess /

Chorus

Is it drug that we take the doctrines in our head /
I know we're not like that I know we're not all bad /
We like to see children play see them o.k /
Whatever happens why take that away /

Chorus
