

# Patrick Nuo, Be Careful Not To Be Too Careful

I always knew how to lock up my soul  
Exception all cases when I give up control  
Was always afraid to loose myself and you

You worry too much 'bout being lonely  
But I can tell you you're not the only  
Who is need of someone  
Someone who can catch your fall

Be careful with your lover take care of your soul  
Be careful with your words and don't you loose control  
Be careful with your feelings and take care of your friends  
But be careful not to be too careful

We got it all but we wasted it away  
There is so much that we never say  
We stand all along with our backs against the wall  
Tell me who can catch our fall

yeah yeah yeah

Be careful with your lover take care of your soul  
Be careful with your words and don't you loose control  
Be careful with your feelings and take care of your friends  
But be careful not to be too careful  
But be careful not to be too careful

We stand all along with our backs against the wall  
Tell me who can catch your fall

Be careful with your lover take care of your soul  
Be careful with your words and don't you loose control  
Be careful with your feelings and take care of your friends  
But be careful not to be too careful

Be careful with your lover take care of your soul  
Be careful with your words and don't you loose control  
Be careful with your feelings and take care of your friends  
But be careful not to be too careful
