

Paul Brandt, We Are The One

Unaware angel falling into sleep
I never quite believed that I'd get in this deep
I don't have a doubt
We are the one
Oh I love to watch you as the day begins
Sun comes through the window
Starts to kiss your skin
Chase the shadows out
We are the one

CHORUS:

We're the story told since time began
We're what heaven holds inside her hand
We're the one thing I never knew I needed
But you complete me and
We are the one

I want to be with you as the years go by
I know I won't be perfect, but for you I'll try
That's what love's about
We are the one

CHORUS 2x
