Paul Brandt, What's Come Over You

Something's missing, something's wrong Something's not right where it belongs Why am I doubting what I thought I knew What's come over you

Where's the laughter where's that touch That made me feel you were in love I pray it's just a phase you're going through What's come over you

BRIDGE:

I can roll with the tide, come in from the rain Turn my back to the wind, stand my share of pain But if you don't love me there's nothing I can do What's come over you

All these memories of all those times Make it so hard to say goodbye To all those dreams we shared that won't come true What's come over you

BRIDGE
