

Paul Gilbert, Space Ship One

I've got a car cruising down the street
I wanna take you for a ride
Strap yourself into the passenger seat
And let me take you on a drive
You know my grandfather always said
That a man is only good as his tools
And my car's pretty good but
Space Ship One just rules
Space Ship One just rules

I've had a Volvo and a Cadillac
I've driven everything in between
I like the feel driving down the road
But now I just cannot forget what I seen
This little number's gonna say goodbye
To all the gravity and unleaded fuels
Yeah my car's pretty good but
Space Ship One just rules
Space Ship One just rules

I've saving money gonna get me a ticket
And I'll buy you one if you come along
The only way that I know how to make some money
Is to play guitar in rock and roll songs
So I put my amplifier in the back of my car
Meet my band for a gig at the school
Yeah we're all pretty good but
Space Ship One just rules
Space Ship One just rules
