

Paul Whiteman, Whats The Name Of That Song

What's the name of that song
That makes me think of daisies,
Makes me dream of spring
Makes me wanna whistle
Makes me wanna sing
I wish I knew

What's the name of that song
That puts a silver lining right inside my coat
Makes me think of ice cream sliding down my throat
I wish I knew, what's the name of that song
This morning after breakfast I sang it all through
But tonight I forget all the words
Excepting I love you

What's the name of that song
That makes me think of lovebirds nesting in a tree
Makes me wanna whisper, "will you marry me?"
Makes me think of babies bouncing on my knee
What's the name of that song
