

# Peel, Neverending

Feels like the universe  
Like some forgotten curse  
Sleepwalking through the night  
Dream's cold - this life  
Sun is up now, face the world  
Someone's nailed a cryin' girl  
Exposed in black and white  
World's cold - this life  
I don't know why  
I don't know when  
It all began with sorrow  
Let it out

Let it out  
It can't be  
It can't be  
Neverending  
It's on these crowded streets  
In every man you meet  
It's always within sight  
Dark cold - this life  
Now, time might heal these wounds  
But light turns dark too soon  
And dogs still bark and bite  
World's cold - this life
