

Peter Andre, Only One

Oh girl, you're the only one I've ever loved
And I wanna share my life with you girl
Never had it feel so right

Thinking back when we were always on the phone
It felt so good
To think I'd never be alone

Well you went your way baby, I went mine
But I knew in time, I'd find you
the thought of lovin' you would carry on
And it kept me strong
But here's where you belong

Oh girl, you're the only one I've ever loved
And I wanna share my life with you girl
Never had it feel so right

And it's all because of...

You were there with a smile to keep me warm
Girl losing you would leave me with a heart so torn
Now what I'd give, to make you mine all mine
For the longest time, ooh baby I
I wanna hold you baby endlessly
You'll see the best in me
Believe me you're the one

Oh girl, you're the only one I've ever loved
And I wanna share my life with you girl
Never had it feel so right
X2

Break it down

All night long you got me going on
All night long
All night long you got me going on
All night long

Oh girl, you're the only one I've ever loved
And I wanna share my life with you girl
Never had it feel so right

And I wanna be good to you
And I wanna give you all my love
And I wanna touch U baby there

X2 to fade
